

Franklin County Public Hospital District #1 Area Description

Franklin County Public Hospital District #1 is an EMS agency that serves a large, active agricultural area including the City of Connell, Basin City, Mesa, and Eltopia. Nestled between the Snake River and Columbia River, we are located in the heart of the Columbia Basin. With 50 volunteer responders, 7 ambulances, and 4 stations throughout the district, FCPHD#1 responds to about 700 calls a year and provides BLS service to nearly 12,500 people. Although our area is rural, we are less than 30 minutes from the City of Pasco and the Tri-Cities Airport. The North Franklin School District prides itself on the 4-H and FFA organizations, extracurricular activities, highly competitive sports programs, along with the number of alumni who continue onto higher education after graduating. Our community consists of multi-generational families, however, with people and families new to the area, the population is continually growing.
